Subject: Camera System Ballpark

Brian, here's a ballpark of what I think it would cost to have us set you up some kind of live recording session. Keep in mind this isn't something we normally cover but it is within the realm of things we're able to do.

6x ULTRAVOICE XM1800S Microphones
1x Premium 16-input 2/2 BUS Mixer
Cables
Total: \$950

1x HD WEBCAM with Tripod/Mounting Brackets
1x Computer Hardware
1x Video Mixing/Recording Software
Cables
Total: \$1,150

Ballpark Total: \$2,100

I still maintain that we should get Norman Electronics to make a bid. If it's anywhere close and as long as they can get us the proper format then I would suggest having them perform the setup/maintenance. We can take the file and have it uploaded whenever necessary, there will be no additional cost from us, assuming you would like to use us during your normal allotted time.

I will call Mike Fields and let him know what we're thinking so feel free to forward this to him as well.

Regards,
