DATE: March 25, 2013

SUBJECT: Add three additional cameras to system. This bid is for two megapixel cameras, which in my opinion are the only cameras that will give you the detailed clarity to have recognition of people in this large of an area. These cameras will give you the ability to identify anyone either damaging any of the vehicles or any physical altercation in the parking lot. I feel the police would need this clear of a picture in order to find and prosecute anyone with success. Add one digital dome camera in the break room.

- 1) Run wiring from IT room to two cameras on South wall of annex aimed at parking lot and program DVR.
- 2) Install two cameras with vari-focal lens inside weatherproof housings. One in southeast corner and one on southwest corner.
- 3) Install vari-focal dome camera in break room downstairs behind janitors office.
- 4) Install 8 port 10/100 MBPS switch w/poe to support IP cameras.
- 5) Install another 2 terabyte hard drive in DVR to preserve the recording time of DVR.

The total cost of this project would be \$4,180.00 including labor.

Supply a one-year parts warranty on the installed equipment. All warranties exclude lightning, power surges, brown outs, other acts of God, and customer/employee abuse or neglect.

Thank you for the opportunity to bid on this improvement to your facility.
