Brian,.

After visiting the steps at the courthouse in Mt Pleasant I would propose the following to repair. Using a light electric bushhammer I will remove the existing 1 inch cement past that is delaminating and falling off. The existing landing and steps will be power washed and made ready to add an epoxy bonder and new cementious overlay. The number of steps needing repair looks to be 4 with the possibility of more. The work can be performed in 1 to 2 days where foot traffic will be limited.

The price is \$2,000.00 for the four steps. The landing and additional steps can be preped and epoxy bonded and coated to match the entire step and landing area with one finish. The additional cost to do the entire area would be \$2,500.00 and still be included in the 1 to 2 days. We can arrange for this to be scheduled at your connivence should you find this acceptable.

Thanks,

Daniel Apperson
