DATE: July 10, 2018

SUBJECT: Installation of door access lock, remote entry control, video and audio recording of people entering the County Treasurer's Office.

SCOPE OF WORK: Install a door strike and intercom control with audio and video, so that Sheryl Preddy can grant access to individuals into her office. The system has a camera with microphone so that she can see people wishing to gain entry and converse with them before access is granted. All conversations and video will be recorded on the intercom master. Also install keypad.

1. Install Hands Free Two-Way Door Intercom System with door release control. This system also can see people standing at the door from the desk console. It has two way audio and records entry activity.
2. Mount electronic strike to lock and unlock door remotely from Sheryl's desk.
3. Install keypad on the outside of the door, so that authorized personnel can gain entrance without a key.

The cost of this project would be \$1,679.00 in material and \$800.00 in labor for a total of \$2,479.00.

Supply a one-year parts and labor warranty on the installed equipment. All warranties exclude lightning, power surges, brown outs, other acts of God, and customer/employee abuse or neglect.

Thank you for the opportunity to bid on this improvement to your facility.
