Important Information Regarding Your Automated External Defibrillator

Thank you for your interest in working with Cardio Partners, Inc. ("Cardio Partners"). Cardio Partners is a leading national provider of automated external defibrillators ("AEDs"), AED program management, CPR and AED training. We appreciate the opportunity to serve you and support your interest in developing a heart safe environment in your workplace. Please find attached herein, important information with regards to the purchase of your AED and/or related equipment. If you have any questions, Cardio Partners would be happy to assist you. Please contact us at 866-349-4363.

How does an AED work?

An AED is a portable electronic device that automatically analyzes the heart's rhythm in life threatening situations. If it detects a problem, an AED delivers an electrical shock, known as defibrillation to restore the heart's normal rhythm.

What are the liabilities incurred by having an AED in our workplace?

Good Samaritan Laws have been established in all states to mitigate the liability of a trained individual using an AED to attempt to save the life of an individual suffering from sudden cardiac arrest. In addition, in 2000, Congress passed and President Bill Clinton signed the Cardiac Arrest Survival Act which provides those who acquire and use an AED with protection from liability. With proper training in AED use, the risk of misuse in your workplace is low. Cardio Partners strongly recommends that you read the Cardiac Arrest

Which states have Good Samaritan Laws?

Each state has passed its own version of a Good Samaritan Law, which provides some level of immunity to laypeople who administer an AED. Please consult your state for its equivalent Good Samaritan Law.

Does our workplace now need medical direction?

It is always recommended that a physician be assigned as the medical director of your AED Program. Medical direction may include oversight by a physician of some of the important aspects of an AED Program, including AED site selection, written policies and procedures, CPR and AED training, AED registration and AED maintenance, each of which are, in part, described below. Unless otherwise provided in a separate written agreement, the purchase of your AED does not come with medical direction from Cardio Partners. Please consult your state for its medical direction requirements.

What is an AED Program and does our workplace need one?

An AED Program is designed to establish protocols regarding the use and management of your AED. AED Programs typically include protocols including AED medical direction, AED maintenance, quality assurance programs, reporting requirements, procedures for use and communication of AED usage. Certain states have requirements for AED Programs. Cardio Partners provides services related to AED Programs. Unless otherwise provided in a separate written agreement, the purchase of your AED does not come with an AED Program administered by Cardio Partners. Please consult your state for its AED Program requirements.

Does our workplace need a prescription?

For nearly every circumstance, a written physician's prescription is legally required for the use of an AED. Certain AEDs are sold with a physician's prescription from the AED manufacturer. Certain laws do not allow a prescription to be valid after one year. It is your responsibility as the purchaser of an AED to have a proper physician's prescription for your AED. The purchase of your AED, except in instances in which you have agreed in writing to purchase Cardio Partners' Program Management Services, does not come with a physician's prescription from Cardio Partners. Please consult your manufacturer for inclusion of a prescription with your AED purchase and your state for its prescription requirements.

Do the employees in our workplace need CPR and AED training?

Each state has different requirements for CPR and AED training as part of a company's AED Program. In most states, the primary requirement is that selected employees are required to be trained in CPR and AED use. On a nationwide basis, Cardio Partners provides CPR and AED training. Unless otherwise provided in a separate written agreement, the purchase of your AED does not come with CPR or AED training from Cardio Partners. Please consult your state for its training requirements.

Does our workplace need to register our AED with local authorities?

Each state has different requirements for registration of a workplace AED with local EMS agencies. The goal of such registration is to allow local 911 or equivalent first responder dispatches to advise a caller responding to an emergency as to the nearest AED. Cardio Partners provides registration services as part of its Program Management Services. Unless otherwise provided in a separate written agreement, the purchase of your AED does not come with an AED Program administered by Cardio Partners. Please consult your state for its AED Program requirements.

What ongoing maintenance is required?

AEDs are designed to save lives. There are certain state and manufacturer maintenance standards that are designed to assure that your workplace AED is ready to be deployed whenever it is needed. As a result, your workplace AED will need to be routinely tested to assure that it is functioning properly. As part of your AED Program, regular monthly checks should be completed to allow your workplace to comply with these standards. Cardio Partners provides selected maintenance services as part of your workplace AED Program. Unless otherwise provided in a separate written agreement, the purchase of your AED does not come with an AED Program administered by Cardio Partners. Please consult your state and AED manufacturer for applicable AED Program requirements.
