Titus County Server Security Changes

Prepared by: Dustin Ballard, CIO
Date: 2/23/2021
Pricing valid for 60 days

Security Changes to Current System (Install and Configure)

I. NET Data IT Support will install and configure the below items on the iSeries. IT Support will also train appropriate staff (County LASO / IT) to use and monitor the deployed software.

- Real-Time Security Event Monitoring Software for IBM Systems

- Licensing of Kiwi SEIM Services to store, view and manage system security events. *

- Installation and configuration of Kiwi SEIM on provided server. **

One Time Cost: $3,785

Annual Cost / Maintenance (after first year): **$700 / yr.**

* The county is responsible for optional support for Kiwi SEIM after the first year at their discretion.

** The county must provide a windows PC or Server for SIEM Services to be installed on. This system should meet the following minimum specs: Windows 8 Pro x64bit (or greater) 8gb ram and 2TB storage network access to the Titus county AS400 (Netdata Can Provide a quote for this system if needed)
