

Titus County Commissioner's Court

October 6, 2023

Wade Panm EMS Trainer called and said they got a grant for a tower for UHF communication which is for EMS Hospital. They would like to put a repeater on the south side of Titus County. They advise that they would like permission to install it on Tri Lakes VFD property which is now owned by the county since Luminant donated it to the county. The tower is freestanding, with no guide wires and stands 180 feet. The second repeater would be mounted on the Talco water tower. The Tri Lakes VFD has no problem with this being installed by our station. This will increase our communications with EMS on emergency services in our district and the county. We were also advised that if we wanted to, we could put our antenna on their tower which would increase our height by 100 feet from where we are now.

Jerry Ward, Chief

Tri Lakes VFD
